Clinical Gait Analysis: A Focus on Interpretation

THREE - DAY BASIC and ADVANCED COURSES

The University Hospital Pellenberg (Belgium), Gillette Children’s Specialty Healthcare (St. Paul, US) and the Connecticut Children’s Medical Center (US) will offer simultaneous Basic and Advanced courses on clinical gait analysis, July 1-3, 2010.

The basic course teaches introductory skills for analysing gait, interpreting gait data, and planning associated treatments. The advanced course is tailored to clinicians who have experience in gait analysis. It examines, in greater depth, the complexities of gait interpretation for children who have disabilities.

Both courses focus on interpreting gait data and planning associated treatments for ambulatory children with cerebral palsy and other gait disorders.

Featured Speakers include: Tom Novacheck, Tim Theologies, Jon Davids, Guy Molenaers, Anja Van Campenhout, Roy Davis, Michael Schwartz, Jaap Harlaar, Scott Delp, Sylvia Ounpuu, Melany Westwell, Jean Stout, Kaat Desloovere

PRE-COURSE SYMPOSIUM June 30, 2010:
Spasticity: assessment and advances in selective treatment
